

Quality improvements for your vehicle

This upgrade includes:

- Faster start for the operating system
- Smoother scrolling on the central multifunctional instrument display
- Optimized display for the Rear View Camera
- General improvements to the software

Model = "U10", "U25"
 Current iLevel < "23-11-564"
 Target iLevel ≥ "23-11-564"

MINI Intelligent Personal Assistant

In future, the Intelligent Personal Assistant in your MINI will have a MINI-specific male voice that perfectly matches the character of your MINI. With a new technology base (Alexa Custom Assistant from Amazon), we're preparing your MINI Intelligent Personal Assistant for further improvements in voice interaction in the future.

Target iLevel ≥ "24-03-500"
 Current iLevel < "24-03-500"
 Market = "Mexico"
 Country = "MX"
 Model = "U025"

Green Mode Experience View: Efficiency trainer and consumption displays at a glance

The new Experience View complements the Green Mode as a specific display in the MINI Interaction Unit. Depending on your current driving style, the display will change color to green or red. The animal animations also communicate the current efficiency status in a playful way. Tips on anticipatory driving help you to drive as economically as possible. The display of the extra kilometers achieved shows you how much range you've gained through your efficient driving style, giving you extra motivation.

Target iLevel ≥ "24-03-527"
 Current iLevel < "24-03-527"
 Model ∈ { "U025" }

Drive Recorder: Transfer video recordings directly to your MINI App now too

This means you have videos from your Drive Recorder and Anti-Theft Recorder available anytime and anywhere in your MINI App. Until now, you could only view these on the MINI Interaction Unit, or save them on a USB stick.

Target iLevel \geq "24-03-500"

Current iLevel < "24-03-500"
